

SNOW LOAD RATED TABLES

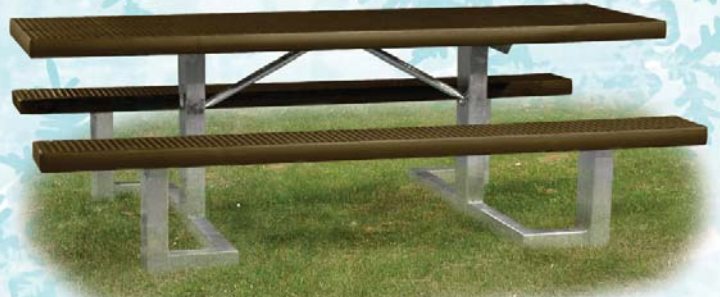

500 lbs. to 1100 lbs. Per Square Foot Snow Load Capacity!

These Pilot Rock brand picnic tables have been designed and tested to withstand high elevation snow loads. To achieve the following ratings, these steel frame tables must be equipped with our V-Type expanded steel or H-Type perforated steel top and seat structures. Standard and accessible tables are available. Remember ... the rating is Per Square Foot, not per table!

Models WXT and WXTH Universal Access Tables (see Page 22-23) in 6 ft. or 8 ft. lengths, with V-Type expanded steel or H-Type perforated steel top/seats.

Model WPTS Universal Access Table (see Page 23) in 6 ft. or 8 ft. lengths, with V-Type expanded steel or H-Type perforated steel top/seats.

1100 Lbs. Per Square Foot

Model XT Standard Tables (see Page 25) in 6 ft. or 8 ft. lengths, with V-Type expanded steel or H-Type perforated steel top/seats.

Model APT Multi Pedestal Tables (see Page 34) in 6 ft. or 8 ft. lengths, with V-Type expanded steel or H-Type perforated steel top/seats.

759 Lbs. Per Square Foot

Models XT-E and XTH-E Extended End Wheelchair Accessible Tables (see Pages 25 and 26) with 8 ft. top and 6 ft. seats. The 2-ft. extension on the table top was tested to withstand over 750 lbs. per sq. ft. without failure.

500 Lbs. Per Square Foot on a Recycled Plastic Table

Model WAT-8 A-Frame Table (see Page 30) 8 ft. long and wheelchair accessible at both ends. The table structure uses Recycled Plastic leg posts and top/seat planks and incorporates steel braces for support. This table was tested to hold over 500 lbs. per sq. ft. load without failure.
